Dear Tutelligence Team,

On behalf of the Government of the Kyrgyz Republic, I am writing to formally express our earnest interest in collaborating with Tutelligence to enhance educational opportunities and technological advancements within the Kyrgyz Republic. This letter serves as a preliminary agreement to explore the potential collaboration between our entities, aligned with our mutual goals of fostering educational innovation and embracing the AI-powered future

Our initiative to bridge the Kyrgyz Republic with the global academic and technological communities, specifically through connections with professors, students and researchers at esteemed institutions such as Harvard University and the Massachusetts Institute of Technology (MIT), underscores our commitment to advancing our educational landscape and national development. We believe that partnering with Tutelligence in organizing an AI Conference in Central Asia complemented by a series of workshops and a 7-day cultural and educational trek across the Kyrgyz Republic, will significantly contribute to this vision

Furthermore, the Kyrgyz Government is particularly interested in the implementation of the Tutelligence platform/service, customized to our national curriculum, to provide our students, researchers, and educators with early exposure to Al and personalized learning experiences. This step is crucial in positioning the Kyrgyz Republic as a leader in educational innovation within Central Asia

To support the fruition of these initiatives, the Kyrgyz Government is prepared to:

- Allocate a dedicated team from the Presidential Administration to coordinate and oversee this collaboration (advisory board);
- Provide financial backing for the development of a Tutelligence prototype that aligns with our national curriculum, ensuring its relevance and effectiveness;
- Ensure the availability of necessary infrastructure and technological resources for the seamless integration of Tutelligence;
- Align Kyrgyz national policies and regulations to facilitate the adoption and operation of AI-based educational tools;
- Initiate public awareness and engagement campaigns to foster a supportive environment for AL-enhanced learning;
- Promote collaborative research and development efforts to tailor Tutelligence to our unique educational needs.

By proceeding with this letter of intent the Kyrgyz Government looks forward to laying the foundational steps towards a fruitful and enduring collaboration with Tutelligence, ultimately advancing our shared goals of educational excellence and technological innovation.

Sincerely,

Deputy Chairman
of the Cabinet of Ministers
of the Kyrgyz Republic

Edil Baisalov
